Hex Table

Incorporated Architecture & Design

Hex Table

The Hex Table explores systemic ordering and modular relationships: each stainless steel pod fits precisely alongside others, offering infinite possibility for the table's ultimate configuration and size. While embracing the modern need for flexibility, the Hex Table simultaneously evokes the historic discourse of American minimalism and is indebted throughout to a single truth: the timeless geometry of nature – an undeniable foundation for architectural principles.

About Incorporated Architecture & Design

Incorporated is a multi-disciplinary architecture and design studio with experience across a wide range of project types that specializes in the integration of the design disciplines. Having executed hotels, residential buildings, restaurants, galleries, retail stores, private residences and products, Incorporated approaches a chair, a room and a super structure all with a singular philosophy.
