

LERIVAL

Infinity Bench

Carl Fredrik Svenstedt

Infinity Bench

The organic shape of this bench / table / recliner is the result of clever mathematics. The rings are serial, concentric hoops, like the layers of an onion, cut from less than 3.4 m² of flat furniture-grade plywood using CNC technology. The variations in diameter of the rings create a structurally stable, undulating sequence.

About Carl Fredrik Svenstedt

Carl Fredrik Svenstedt, a Swedish-born, Paris-based architect, has worked on international architecture projects and industrial design, and everything in-between. He believes in the continuum of the designed world, and designs across the whole spectrum of scale: from the macro city down to the tangible, hand-held object.

Dimensions: Standard height is 13.25" (34 cm, shown above), Alternate height is 17.25" (43.8 cm). Width is 23.5" (60 cm), Length is 63" (160 cm)

Materials & Finishes: Flat sheet furniture grade plywood, clear poly finish. Custom finish available upon request.

Pricing: Please refer to Price List for List and Wholesale pricing, and product lead times.
